

Abstract

Communication system, peer-to-peer message filter computer and method for processing a peer-to-peer message

5

Peer-to-peer messages supplied to a peer-to-peer message
filter ~~(117)~~ from a mobile radio communication network ~~(102)~~
are identified and delivered to a superpeer computer ~~(120)~~
which is connected to a mobile radio network-fixed network
10 interface computer ~~(116)~~. The peer-to-peer message filter
~~(117)~~ is disposed in the mobile radio communication network
~~(102)~~. At least one digital rights management service ~~(122)~~
is installed in the superpeer computer ~~(120)~~.
